Configurable reconciliation templates help companies standardize the reconciliation process across all business units, improving the quality of reconciliations and easing both reviews and audits.

1. **Schedule & Supporting Items**
   - Build, import, or bulk-import any schedules, prepaids, or accruals.
   - Address unidentified differences with reconciling items. BlackLine automatically ages all items.

2. **Previous Period**
   - Compare current and prior account reconciliations with a click of the mouse.

3. **Unidentified Difference**
   - Automatically calculates (in real-time) your unidentified difference for all reconciliations. Configurable certification thresholds ensure adherence to company policy.

4. **GL Balance**
   - Automatically import your GL Balances from any ERP or subledger system. If your rec has been completed and the balance changes, BlackLine decertifies the rec and alerts users via email.

5. **Comments**
   - Attach comments to a reconciliation and choose whether to keep them for one period, carry them forward, or mark them as temporary review notes.

6. **Supporting Documents**
   - Eliminate binders and boxes by uploading supporting documents. Files can be uploaded once and carried forward if necessary. BlackLine can accept any file format.
